Verification that all manufacturer specified end stops or docking gates are properly installed. ES: Lift Unit and Straps Inspection of lift unit casing for cracks and alignment.		
2 3 4 NOT	Verification that all fasteners and set screws are properly tightened on the trollies and rails/tracks. Ensure that the rail/track is free of gaps (unless required by design). If included in installation, verify rail turntable function, exchanger function, gate alignment, and safety block installation. Confirm track is clean and clear of all debris. (Use manufacturer's recommended cleaning materials to avoid damage to the motor case and other components.) Verification that all manufacturer specified end stops or docking gates are properly installed. ES: Lift Unit and Straps Inspection of lift unit casing for cracks and alignment. Verification that the lift unit charges properly.		
2 3 4 NOT	Verification that all fasteners and set screws are properly tightened on the trollies and rails/tracks. Ensure that the rail/track is free of gaps (unless required by design). If included in installation, verify rail turntable function, exchanger function, gate alignment, and safety block installation. Confirm track is clean and clear of all debris. (Use manufacturer's recommended cleaning materials to avoid damage to the motor case and other components.) Verification that all manufacturer specified end stops or docking gates are properly installed. ES: Inspection of lift unit casing for cracks and alignment. Verification that the lift unit charges properly. Inspection and activation of hand control for full operation (e.g., up, down, left, right) and "return to charge" function if applicable.		
2 3 4 NOT	Verification that all fasteners and set screws are properly tightened on the trollies and rails/tracks. Ensure that the rail/track is free of gaps (unless required by design). If included in installation, verify rail turntable function, exchanger function, gate alignment, and safety block installation. Confirm track is clean and clear of all debris. (Use manufacturer's recommended cleaning materials to avoid damage to the motor case and other components.) Verification that all manufacturer specified end stops or docking gates are properly installed. ES: Inspection of lift unit casing for cracks and alignment. Verification that the lift unit charges properly. Inspection and activation of hand control for full operation (e.g., up, down, left, right) and "return to charge" function if applicable. Confirm any and all lift unit indicator lights are functioning. (e.g., red service warning light, charging		
2 3 4 NOT	Verification that all fasteners and set screws are properly tightened on the trollies and rails/tracks. Ensure that the rail/track is free of gaps (unless required by design). If included in installation, verify rail turntable function, exchanger function, gate alignment, and safety block installation. Confirm track is clean and clear of all debris. (Use manufacturer's recommended cleaning materials to avoid damage to the motor case and other components.) Verification that all manufacturer specified end stops or docking gates are properly installed. ES: Inspection of lift unit casing for cracks and alignment. Verification that the lift unit charges properly. Inspection and activation of hand control for full operation (e.g., up, down, left, right) and "return to charge" function if applicable.		

6	Full extension and inspection of lift strap for loose threads or frays.		
7	Inspection of spreader bar and clips for cracks and for loose or missing rings or cotter pins.		
NOT			
	Load Testing	PASS	FAIL
1	Verification of any "soft start" or "soft stop" features and that lifting speed does not exceed 2.5 inches per second with "zero" load.		
2	Verification of load testing and deflection testing at the manufacturer's specified maximum rated lift capacity.		
2	Verification of any "soft start" and "soft stop" features and that lifting speed does not exceed 1.5		
3	inches per second under maximum rated lift capacity.		
4	Verification of function of emergency stop at maximum rated lift capacity.		
5	Verification of emergency lowering feature at maximum rated lift capacity.

Installing Contractor		COMPLETE
After the activities listed in the above checklist and in the manufacturer's installation/operations/owner's manual(s) have been completed, the installing contractor shall release the ceiling mounted lift installation to VA representative.		
GNATURE: DATE:		
TITLE:		

VA Representative		COMPLETE
After the activities listed in the above checklist and in the manufacturer's installation/operations/owner's		
manual(s) have been completed, the VA representative shall review those items with the installing		
contractor prior to releasing the ceiling mounted lift into service to ensure completion of all requirements.		
IGNATURE: DATE:		
TITLE:		

Manager of the Service Using the Ceiling Mounted Lifts		COMPLETE
After the activities listed in the above checklist and in the manufacturer's installation/operations/owner's manual(s) have been completed, the manager of the service using the ceiling mounted lifts confirms that the current staff have received initial training on ceiling mounted lifts and that there is a process in place to		
provide ongoing training on the proper use of ceiling mounted lifts.
